Mte. Bento Balduino n 403 – Oficinas - Ponta Grossa – PR - Brazil

I have advanced experience in IT infrastructure and user support, an area that I have been working on for several years optimizing experience and knowledge. I like to work as a team, but if there is a need to do tasks alone, I have already managed to produce some collaborative works. My last experience is the management of energy efficiency projects, searching for possibilities and improvements to steam piping system, and energy consumption.

PROFESSIONAL QUALIFICATION

Management of energy efficiency projects, analysis to find improvements, analysis of data values from machines and sensors, analysis report, AutoCAD, DevOps, IT infrastructure, knowledge about IoT, MS Office.

SKILLS

Software: PCB Design Proteus, PCB Eagle, NI Multisim, Autodesk AutoCAD, HTML5, CSS3, MS Office, Corel Draw.

Programming Languages: JS | Frameworks: Node, Tailwind, Vue.js.

Languages: Portuguese, Advanced English, Basic Spanish.

PROFESSIONAL EXPERIENCE

Engineering Analyst Intern | Continental – 10/2023

- Management of energy efficiency projects, analysis from data values, documentation and management of steam and energy consumption, analysis to search improvements, management of sensors from machines, PID control from valves.

IT Analyst | Self-Employed - 10/2021 to 10/2022

- Provision of network infrastructure services and support of servers for companies, Assistance to Users of RDP, maintenance and management of IT infrastructure and implementation of auxiliary systems.

Trainee in IT | Klop Informática - 08/2019 to 04/2020

- Support and service in business IT, maintenance of electronic power peripherals (motherboards and nobreaks).

Freelancer | Baston Ind. de Aerossois – 07/2016 to 09/2016

- Development and system documentation for storage confidential files.

Administrative Assistant | ;DEBUG Telecom – 05/2013 to 08/2015

- Learned about network infrastructure, computer maintenance, customer service and inventory logistics.

EDUCATION

Ponta Grossa Educational College - UNOPAR

Attending: Bachelor of Electrical Engineering - 2019-2023.

Federal Technological University of Paraná – UTFPR

Studied: Bachelor of Electrical Engineering - 2016-2019.

Technological innovation Project: UTFPR – PG / IUT

Research: Creation and development of electronic project.

Intellectual Property: [2] Henrique Terzi Lucchetta / [1] Luis Felipe Rochinski Rodrigues. From: 13/04/2017 to 23/07/2020.

Extension Project: UTFORCE E-RACING - UTFPR

Research: Design engineering / development of 3D encapsulation for telemetry sensors, and sensor development for electric vehicle suspension. Supervisor: Professor Frederik Conrad Jensen. From: 07/08/2018 to 07/08/2020.
